Laboratory Fact Sheet

MISSION STATEMENT

Marinco Bioassay Laboratory, Inc. (MBL) helps NPDES permittees maintain compliance by providing dependable and convenient whole effluent toxicity testing.

ABOUT OUR COMPANY

Since our inception in 1988, we have grown into one of the largest toxicity testing laboratories in the Southeast and an industry leader. Our 5600 sq. ft. facility in Sarasota, Florida, is also home to our state of the art aquaculture program.

MBL was the first and is still the only Florida WET lab to culture all of its test organisms in-house. That translates into low stress, better-acclimated test organisms and more reliable results for our clients. It has also enabled us to become one of the nation's premier suppliers of aquatic toxicity testing indicators.

AQUACULTURE PROGRAM

Pursuing the best testing processes meant that we also had to develop a superior aquaculture program. Your laboratory can now benefit from our experience and expertise. Species available for immediate shipment include:

- *Pimephales promelas* (fathead minnow)
- *Cyprinella leedsi* (bannerfin shiner)
- *Ceriodaphnia dubia* (water flea)
- *Daphnia magna* (water flea)
- *Pseudokirchneriella subcapitata* (unicellular algae)
- *Americamysis bahia* (mysid shrimp)
- *Menidia beryllina* (inland silverside)

LABORATORY SERVICES

- Acute & Chronic Tests for NPDES Permits
- Toxicity Identification Evaluations (TIEs)
- Toxicity Reduction Evaluations (TREs)
- Chemical Product Testing
- LC50, IC25, and NOEC Determinations
- RO Reject Water Toxicity Testing
- Ion Imbalance Toxicity Evaluations
- Aquatic Toxicity Consulting
- New Permit Review

CLIENT BENEFITS

- The Industry's Most Stringent QA/QC
- NELAP Accredited Laboratory
- Samples Accepted Seven (7) Days/Week
- Courier Pickup & Free Sample Kits
- Easy-To-Understand Results Synopsis
- Free Permit Analysis and Test Quotations
- Dedicated Customer Support Reps.
- Telephone Review of Test Results/Reports
- Immediate Verbal Confirmation of Results
- Regulatory Agency Intermediate

CONTACT
